Ronald Borsellino  
Director  
Hazardous Site Clean-up Division, Region 3  
Environmental Protection Agency  
Pennsylvania, USA

Thursday, 2 June 2011

**VIP INVITATION TO SPEAK**

Dear Mr. Borsellino,

I am delighted to cordially invite you to speak at IQPC's **3<sup>rd</sup> edition of the Marcellus Shale Gas Environmental Summit** taking place in Pittsburgh, Pennsylvania from 24 to 26 October 2011. Taking into consideration the public concern over high volume hydraulic fracturing in low permeability foundations as well as the national concern over energy security, this event aims to address best management practices that will allow the industry to develop sustainably and in an environmentally compliant fashion, promoting both national energy security as well as the protection of our natural resources.

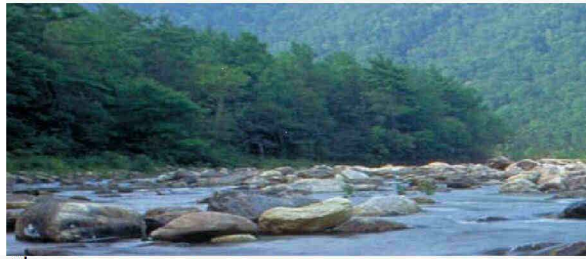

A contribution on behalf of the Environmental Protection Agency and in particular Region 3 during the strategic session entitled "Prevention and clean-up: techniques in accident remediation" being held on **Wednesday, 26 October from 2:30 to 3:45 pm** would prove a truly invaluable contribution to our qualified audience of delegates.

**Event Background**

Shale gas has redefined the energy landscape in this country and around the world. Energy security for the United States and prospects for energy independence is directly impacted by the efficient and safe extraction of natural gas from the shale formations that are an integral part of local Pennsylvanian geology.

There is a widespread consensus that the Marcellus shale play cannot be fully developed until and unless the environmental impacts are properly considered and managed. Indeed the successful shale gas enterprise will need to use the effective management of environmental risk as a way to gain public support and reach new markets in a profitable manner. This instrumental summit will unite oil and gas companies with government, regulators, environmentalists, and investors to forge the way ahead for best management practices in a shifting regulatory climate.

Some of the topics that will be highlighted during the pre-conference workshops and 2-day main conference agenda include mitigating negative perceptions and educating the consumer,

### **3<sup>rd</sup> edition Marcellus Shale Gas Environmental Summit**

Environmental and operational implications of water use in shale gas extraction

Pittsburg, Pennsylvania, October 24 to 26, 2011

community water safety, water recycling, techniques in accident remediation, regulatory updates from Appalachian region states, advancements in hydraulic fracturing, methane migration, wastewater treatment, and long term planning for the shale gas industry.

#### **Benefits of Speaking**

As a speaker at the **3<sup>rd</sup> edition of the Marcellus Shale Gas Environmental Summit**, you will be received as a VIP guest in a red carpet environment on-site. You and your accompanying colleagues will benefit from unlimited access to in-depth industry discussions, exposure to the latest technologies in horizontal drilling and environmental compliance, and first-hand networking opportunities with the oil companies, regulators, environmentalists and investors. Of course the real opportunity is to mesh the realm of energy and environment towards fruitful and sustainable development of the Appalachian region. Your contribution will provide a golden opportunity to promote further collaboration amidst operators in efforts towards environmental compliance.

#### **About Energy IQ & the International Quality and Productivity Center (IQPC)**

Oil & Gas IQ, the organizer, is a division of IQPC, one of the world's largest conference production companies specializing in strategic business-to-business networking platforms. Founded in 1973, IQPC has offices in major cities across 6 continents including Berlin, Dubai, London, New York, Sao Paulo, Singapore, Stockholm and Sydney. IQPC produces more than 1,500 events annually worldwide and continues to grow as a marketing and continuing education platform for emerging and distinguished markets.

#### **Next Steps**

It is my sincere hope that you will accept this invitation and join the speaker faculty as a panelist and VIP during the **3<sup>rd</sup> edition of the Marcellus Shale as Environmental Summit**. Please confirm your availability to me by Wednesday, 8 June 2011.

I look forward to welcoming you in Pittsburgh this October.

Kind Regards,

**Søren S. Du Preez | Program Director - Energy**
